

AcquSight, Inc.

Due Diligence Summary - Energy Sector Relevance

Subject: **acquSight.com** | Entity: AcquSight, Inc. (Virginia) | Founded: 2014 | Principal: David Winks, Managing Director | Address: 154 Lyle Lane, Amissville, VA 20106

VERDICT: Single-principal home-office advisory shell. Real founder credentials in EMP/grid resilience, but no public evidence of an operating business with disclosed contracts, staff, or revenue. Energy is adjacent (microgrid resilience), not a substantive commercial line.

1. What it actually is

AcquSight is a single-principal consultancy founded 2014 by David Winks, operating from his residence in Amissville, VA (Zillow: 3BR single-family home, ~\$1.48M valuation). Headcount is estimated at 1-2 employees with \$130-200K revenue (ZoomInfo / Manta). The website is built on **GoDaddy Websites + Marketing** - the /blog/f/<slug> URL pattern is its signature - and fronted by AWS edge IPs. The 'thin 2019 GoDaddy template' impression matches the digital substance.

2. Substance check - what is there, what is not

Federal prime contracts	None found in USAspending, FPDS, HigherGov, GovTribe, or GovCB. Vendor shell exists; no awarded dollars surfaced.
SBIR / STTR awards	None. site:sbir.gov "AcquSight" returns zero results.
SAM.gov registration	Active. UEI CKE4V41WAFG3 . Small Business / WOSB / SDB. NAICS 541512 (custom programming), 541611 (mgmt consulting).
USPTO patents (assignee)	None.
Press releases (BW / PRN / GNW / EIN)	None on any major wire service.
Lobbying	Listed on LegiStorm (id 233924); page paywalled. Manual check at lda.senate.gov required for amounts and clients.
Virginia SCC filing	Registered, entity ID 07840002.
LinkedIn company page	Does not exist - only David Winks's personal profile.
Other named staff / advisors / board	None surfaced across any source.
Job postings (Glassdoor / Indeed, ever)	None.
Social media (X, YouTube, Facebook)	No presence.
Site blog cadence	Four undated posts, topically vintage ~2019-2021. No recent content.

3. What does exist (credibility signals)

- Winks authored '*Protecting U.S. Electric Grid Communications from Electromagnetic Pulse*' (Foundation for Resilient Societies, May 2020).

- Contributing author to InfraGard's '*Powering Through*' infrastructure resilience series.
- Listed SME on the DHS Resilient Power Working Group (advisory role, not a contract).
- Quoted as an EMP / grid-resilience expert in Fox News and Washington Times (Nov 2021).
- Speaker at OSIsoft PI World 2018, EnergyTech University Prize, and InfraGard EMP SIG Summit 2018.
- Real Virginia entity with active SAM registration - capable of taking subcontracts that would not surface as prime awards in public databases.

4. Energy sector relevance

On the website, power generation is one of five named pillars. The microgrid offering explicitly integrates small nuclear reactors, fuel cells, geothermal, gas turbines, and thermal storage - but framed as **EMP-shielded, cyber-hardened microgrids for defense / critical infrastructure**, not commercial power markets.

No evidence found of utility, IPP, oil & gas, or renewables customers; energy-sector partnerships; M&A advisory transactions; ISO/RTO market participation; or wind / solar product lines. Visible energy engagement is personal thought leadership by Winks, not corporate deal flow.

Energy is a core technical CAPABILITY (resilient on-site power) but applied almost exclusively to defense / national-security resilience. The firm is ADJACENT TO rather than EMBEDDED IN the commercial energy sector.

5. Due diligence verdict

'Is there a real operating business here?' No public evidence of one. The profile is consistent with a one-person thought-leadership / advisory shop, monetizing SME work and possibly subcontracts that do not surface in public databases.

'Is the founder a credible subject-matter expert?' Yes - specifically on EMP and electric-grid resilience.

6. Recommended manual checks before closing DD

Several authoritative sources returned HTTP 403 to automated scraping and should be verified by hand:

- **SAM.gov** - confirm registration is active, view full NAICS / PSC list, exclusions status.
- **Virginia SCC** (cis.scc.virginia.gov) - current standing, annual report filings, registered agent.
- **Senate LDA** (lda.senate.gov) - exact lobbying registrants, clients, dollar amounts.
- **assignment.uspto.gov** - patent assignments (distinct from issued patents).
- **archive.org Wayback** - first snapshot of acqusight.com and content evolution over time.
- **Subcontract data** - FPDS sub-awards, USAspending sub-recipient search, FOIA on DoD/DHS for any AcquSight involvement on prime contracts.
- **Litigation / bankruptcy** - PACER and Virginia Circuit Court records for David Winks personally.
- **Business credit** - D&B Paydex, Experian Business trade lines.

7. Key sources

- acqusight.com | acqusight.com/services
- Potomac Officers Club - David Winks profile
- RocketReach - David Winks; ZoomInfo, Manta, Cience - AcquSight company profiles
- GovCB and GovTribe federal vendor profiles
- OpenCorporates VA entity ID 07840002
- LegiStorm lobbying overview id 233924
- Foundation for Resilient Societies - Winks 2020 EMP paper
- EnergyTech.org speaker page; OSIsoft PI World 2018 speaker page
- Fox News / Washington Times - Winks quoted on EMP threat (Nov 2021)
- Zillow / FamilyTreeNow - 154 Lyle Ln, Amissville, VA (residential address)

Caveat: several authoritative sources (SAM.gov, OpenCorporates, LegiStorm, web.archive.org, WHOIS providers) returned HTTP 403 to automated fetches during research. Findings derived from indexed snippets and third-party mirrors should be verified manually before being relied on for a final DD decision.
